

ABSTRACT OF THE DISCLOSURE

The invention relates to a simulated cigarette which is designed to help quell tobacco addiction. The inventive simulated cigarette consists of a cylindrical body (1) which is made from a plastic material. The aforementioned cylindrical body contains: an inner plug (6) close to one of the ends thereof, natural essences (5) which are disposed next to a filter (7), and a secondary filter (4) having an extended inner diameter (2), to which a tip (3) is connected.
